

EXHIBIT B-1

Human chimeric SWLA antibodies specifically interact with human immune components

The binding constants (K_d) between antibodies and Fc receptors on human lymphocytes

| | |
|--------------------|---------------------|
| Standard human IgG | 2.313×10^9 |
| Standard mouse IgG | 4.316×10^5 |
| SWLA1-H | 1.497×10^9 |
| SWLA2-H | 6.544×10^9 |
| SWLA3-H | 1.471×10^9 |
